Ringlaan - 3 - Avenue Circulaire, 1180 Brussels,
Belgium

1. Venus transit, June 6

The Venus transit of the Sun, is only visible for a short period in Belgium however it will be recorded from beginning to end by a Belgian instrument onboard the satellite PROBA2.

The two imagers of SDO, AIA and HMI, plan to observe the transit Venus in high cadence (the synoptic program will be somewhat changed for this occasion). This high quality data will be transmitted to the SDO data center, located at the STCE.

Stay tuned.

2. Review of solar activity (21 May 2012 - 27 May 2012)

The flaring activity was low during the week as only weak C-class flares were reported by GOES, mostly in Catania sunspot group 56 (NOAA AR 1492). The strongest flare of the week was the C3.9 flare peaking in Catania sunspot group 47 (NOAA AR 1488) at 20:09 UT on May 24.

On May 26 an eruption in Catania sunspot group 36 (NOAA AR 1482) that was at that moment situated 30 degrees behind the west limb was observed by SECCHI/EUVI onboard STEREO A starting at 20:35 UT. It was accompanied by a coronal dimming, an EIT wave and a full halo CME first appearing in the SOHO/LASCO C2 field of view at 21:12 UT. The CME was not directed at the Earth due to its source region position on the far side of the Sun. However, the solar proton flux at energies above 10 MeV started to grow and reached the event threshold level of 10 pfu twice on May 27. After that the SEP flux started to decrease.

On May 27 Catania sunspot group 56 (NOAA AR 1492) produced a C3.1 flare peaking at 05:52 UT. The flare was accompanied by coronal dimmings, post-eruption arcade and a partial halo CME (angular width around 125 degrees, speed around 500 km/s according to the CACTus software). This CME was directed eastward and is unlikely to arrive at the Earth.

3. Review of geomagnetic activity (21 May 2012 - 27 May 2012)

In the beginning of the week the Earth was inside a slow solar wind flow, and the geomagnetic conditions were quiet. An interplanetary shock wave was detected on May 21 by ACE (at 18:45 UT) and by SOHO/CELIAS (at 18:52 UT). The shock was

most probably driven by a halo CME observed on the Sun on May 18. Due to the CME propagation to the north of the ecliptic plane, only the post-shock sheath and not the ICME body arrived at the Earth. The post-shock sheath was followed by the interaction region with a fast solar wind stream from a small low-latitude coronal hole in the southern hemisphere. The fast stream itself (with the speed reaching 700 km/s) arrived on May 23. Due to high interplanetary magnetic field (IMF) magnitude (up to 15 nT) in the sheath and in the interaction region, active geomagnetic conditions ($K = 4$) were reported by Dourbes and IZMIRAN and active to minor storm conditions ($K = 4$ and $K = 5$) were reported by NOAA on May 21-23.

The IMF magnitude returned to average values on May 23, and the solar wind speed started to decrease at the end of the same day. The geomagnetic conditions became quiet and remained so until the end of the week as the Earth was passing through a slow solar wind flow.

4. Geomagnetic Observations at Dourbes (21 May 2012 - 27 May 2012)

5. Future Events

For more details, see <http://www.spaceweather.eu/en/event/future>

Los Alamos Space Weather Summer School

Start : 2012-06-04 - End : 2012-07-27

The Los Alamos National Laboratory established a summer school in 2011 dedicated to space weather, space science and applications. Every year we solicit applications for the Los Alamos Space Weather Summer School. This summer school is sponsored by IGPP (Institute of Geophysics and Planetary Physics) and PADSTE (Principal Associate Directorate for Science, Technology and Engineering), and PADGS (Principal Associate Directorate for Global Security) and has been established to bring together top space science students with internationally recognized researchers at LANL.

First European School on: Fundamental processes in Space Weather in Spineto, Italy

Start : 2012-06-04 - End : 2012-06-09

The Space Weather Integrated Forecasting Framework network (<http://www.swiff.eu>) organizes in June 2012 the "First European School on Fundamental processes in space weather, a challenge in numerical modeling". The School will focus on the theoretical study of Space plasmas, in particular on those systems where a continuous energy injection flow leads to a self-consistent coupling of the large scale, low frequency motions with the small scale, high frequency fluctuations including kinetic effects. Progress in this field heavily relies on numerical simulations that, as a matter of fact, are nowadays more similar to laboratory experiments than to theoretical exercises. This is true in terms of planning efforts in the preparatory phase, of manpower required, of data analysis and cost. The understanding of these processes represents a fundamental step for the future of Space Weather models.

Space Weather Effects on Humans: in Space and on Earth in Moscow, Russia

Start : 2012-06-04 - End : 2012-06-08

During the last thirty years there has been steady progress in our understanding of the influence that space weather has on the state of human health both in Space and at Earth. This development is mainly based on research conducted on humans onboard space stations and spacecrafts, as well as on ground based observations and experimental studies simulating conditions in space. This interdisciplinary field of research requires a wide exchange of expertise in various topics. Only with a global approach it will be possible to establish a mutual understanding, in regard to defining the current state of this research problem as well as identifying what should be pursued in future research activities.

Remote Sensing of the Inner Heliosphere 2011 in Aberystwyth, UK

Start : 2012-06-06 - End : 2012-06-10

We announce the 'Second Remote Sensing of the Inner Heliosphere Workshop' to be hosted by Aberystwyth University and held in Aberystwyth, Wales, UK, 06-10 June 2011. The workshop aims to gather experts from the various fields of remote-sensing observations of the inner heliosphere , including white-light, EUV, and radio observation, together with modellers in order to tackle key outstanding science issues, establish closer working relations, and devise the best ways to move the field forward. In addition, the science learned from remote-sensing observations is key to improving our capabilities of space weather forecasting. The workshop also aims to look at ways in which we can more easily and efficiently share and access the various types of data between individual groups and sub-communities, ways in which we model the inner heliosphere looking at the advantages and disadvantages of the available modelling, updates on present and future remote-sensing capabilities - including those on the STEREO /SDO/Solar Orbiter/Solar Probe+ Missions, and progress on use of the LOw Frequency ARray (LOFAR) and Murchison Widefield Array (MWA) radio arrays - pathfinders for the Square Kilometre Array (SKA) - linking remote-sensing observations of the inner heliosphere with those closer-in to the Sun as well as with in-situ measurements, and investigating further the ways in which these data sets all complement each other and are necessary to gain knowledge and understanding of the fundamental physical processes that occur within the inner heliosphere .

Website:

Solar Wind 13

Start : 2012-06-17 - End : 2012-06-22

The Thirteenth International Solar Wind Conference, organized by the University of Alabama in Huntsville's Center of Space Plasma and Aeronomic Research (CSPAR) and the the University of California, Berkeley's Space Sciences Laboratory, will take place at Sheraton Keauhou Resort on Big Island, Hawaii, USA, from 17 to 22 June 2012. Please note that scientific sessions will start on Monday 18 June.

The conference will conform to the traditional solar wind themes, addressing the current state of knowledge in the relevant fields of solar and heliospheric physics. In particular, the conference will focus on the physics of the corona, the origin and acceleration of the solar wind , its dynamical interactions throughout the heliosphere and the interstellar medium and its boundaries. The program will be composed of both invited lectures and contributed talks and posters.

SHINE Conference 2012 in Wailea Maui, Hawaii

Start : 2012-06-25 - End : 2012-06-29

SHINE stands for Solar Heliospheric and INterplanetary Environment. It is an affiliation of researchers within the solar, interplanetary, and heliospheric communities, dedicated to promoting an enhanced understanding of the processes by which energy in the form of magnetic fields and particles are produced

by the Sun and/or accelerated in interplanetary space and on the mechanisms by which these fields and particles are transported to the Earth through the inner heliosphere .

SHINE research focuses in particular upon the connection between events and phenomena on the Sun and their relation to solar wind structures in the inner heliosphere . The goal of SHINE activities is to enrich and strengthen both physical understanding and predictive capabilities for these phenomena.

International Summer School 'Solar Astrophysics: Modern trends and techniques' in Bogota, Colombia

Start : 2012-07-03 - End : 2012-07-19

The Sun is our closest and most well studied celestial object. From the beginnings of human civilizations, the Sun has played a major role in their development, and in the rituals and customs that can still be perceived in the modern world. Unprecedented advances and new missions have revealed the real complexity of the Sun. New missions like SDO, SolarProbe Plus and other satellite missions (RHESSI, SOHO , TRACE , YOHKOH , etc.) provide information that may help to unveil the secrets of our star . The Observatorio Astronomico Nacional and the Universidad Nacional de Colombia organises an International Summer School in Solar Physics, with the purpose of promoting the solar research in Colombia and help in the personal development of postgraduate students and young postdocs in this area from other countries.

The International Summer School is intended to provide an advanced training in the field of solar physics to last year ungraduate students who are willing to write their final work in any area of solar physics, postgraduate students, and young post-docs having already some initial work in the fields of solar physics.

International Summer School 'Solar Astrophysics: Modern trends and techniques' in Bogota, Colombia

Start : 2012-07-03 - End : 2012-07-19

BUKS2012 in Fodele Beach, Crete, Greece

Start : 2012-07-04 - End : 2012-07-07

The Sun is the most important astronomical object for humankind with solar activity having a direct impact on Earth. From a fundamental point of view the Sun offers an exceptional physics laboratory where the interactions of the astrophysical plasma and the magnetic field can be studied in detail.

The BUKS workshops on MHD waves and oscillations of the solar atmosphere is organised by the following research groups from Belgium, Spain and the UK:

- * The Centre for Plasma Astrophysics, Katholieke Universiteit Leuven, Belgium
- * The Solar Physics & Space Plasma Research Centre, University of Sheffield, UK
- * The Solar & Magnetospheric Theory Group, University of St Andrews, UK
- * The Centre for Fusion, Space & Astrophysics, University of Warwick, UK
- * The Solar Physics Group, Universitat de les Illes Balears, Spain
- * The Astrophysics Research Centre, Queen's University Belfast, UK

BUKS2012 will also honour the contributions of Prof Marcel Goossens to the field of MHD waves and offer an opportunity to celebrate his 65th birthday.

23rd NASA Space Radiation Investigators' Workshop in Durham, North Carolina (USA)

Start : 2012-07-08 - End : 2012-07-11

The 23rd Annual NASA Space Radiation Investigators' Workshop will be held July 8-12, 2012, at the Washington Duke Inn, Durham, North Carolina. The purpose of this workshop is to provide an opportunity for active researchers in the NASA Space Radiation Program to share the results of their work and to explore new directions for research that may benefit the NASA program. The workshop format will include plenary sessions, poster sessions, and a poster contest to recognize and honor student investigators. In addition, there will be special sessions on space physics and technology allowing opportunities for a comprehensive discussion on NASA's overall space radiation protection goals.

Principal investigators receiving NASA funds (including those from the NASA /DOE joint program and the NSBRI) are required to attend; principal investigators funded by the Department of Energy are strongly encouraged to attend. Although attendance at the workshop is by invitation only, other scientists with a legitimate interest in space radiation research are also welcome. If you wish to attend, please send your requests directly to . Requests should be accompanied by an explanation of your relationship to the Space Radiation Program and the type of contribution you wish to make.

ESOF 2012 in Dublin, Ireland

Start : 2012-07-11 - End : 2012-07-15

From 11th-15th of July 2012 international researchers, policy makers, business leaders and global media will gather in the Convention Centre in Dublin, Ireland to take part in the Euroscience Open Forum (ESOF), 2012. A science conference like no other, ESOF 2012 is unique in representing the largest convergence of the Sciences, Humanities and Culture in Europe in 2012. Some of the keynote speakers at ESOF 2012 will include Craig Venter, Rolf-Dieter Heuer, Charles Bolden, Mary Robinson, and Bob Geldof.

CISM Summer School in Boulder (USA)

Start : 2012-07-16 - End : 2012-07-27

The CISM Space Weather Summer School is a 2-week intensive program targeted to first-year graduate students but also attended by undergraduates and space weather professionals. The daily schedule

includes morning lectures, followed by afternoon laboratory sessions where students further explore the day's topics using CISM model simulations, observational data, and sophisticated visualization tools. CISM is making the laboratory materials publicly available for use by others, for example to supplement lecture courses or for student independent study. The deadline for applications is May 1.

<http://www.bu.edu/cism/SummerSchool/overview.html>

IGS Workshop 2012 in Olsztyn, Poland

Start : 2012-07-23 - End : 2012-07-27

The Department of Astronomy and Geodynamics of the University of Warmia and Mazury (UWM) is hosting the 2012 IGS Workshop.

This workshop will be composed of plenary sessions with invited oral presentations, and afternoon sessions composed of poster sessions and IGS Working Group splinter meetings. For this workshop we are soliciting abstracts for the poster sessions.

The key dates for this workshop are as follows:

* Poster Abstract Submissions: March 25 - April 30, 2012.

* Registration: March 25- May 28, 2012.

* Hotel Reservations: March 25- May 28, 2012.

* Workshop: July 23 - July 27, 2012.

http://www.uwm.edu.pl/kaig/igs_workshop_2012/

International Radiation Symposium in Berlin (Germany)

Start : 2012-08-06 - End : 2012-08-10

The IRC's International Radiation Symposium 2012 provides a forum for the scientific community to exchange recent results and evolving ideas relevant to many areas of atmospheric radiation. Quadrennially convened, the IRS assembles a global network of scientists and students engaged in studies pertaining to the Earth-atmosphere-Sun system, and encourages international cooperation in radiation research crucial to understanding and predicting Earth's dynamic climate and habitability. The IRC invites you to Berlin and welcomes your participation in this endeavor.

<http://www.asiaoceania.org/aogs2012/public.asp?page=home.htm>

Solar Information Processing Workshop (SIPWork VI), at Montana State University, Bozeman

Start : 2012-08-13 - End : 2012-08-16

You will have noticed the slight re-branding of these workshops from 'Image' to 'Information' processing. We think it is time to expand the attention of these workshops to discuss more generally how information

about the Sun can be derived, stored, shared, transformed and analyzed using appropriate techniques from many other disciplines. We will still be covering image processing and computer vision techniques applied to solar physics, but we will also be including other topics such as machine learning, data mining and new computing strategies. The re-branding simply acknowledges and makes explicit what the community has been doing to determine the physics of the Sun.

Link: <http://www.sipwork.org/>

Hinode-6 in St. Andrews, UK

Start : 2012-08-14 - End : 2012-08-17

There will be 7 sessions, with 2 invited speakers per session. The following speakers have been invited to Hinode-6:

Website:

<http://www-solar.mcs.st-and.ac.uk/~hinode6/Hinode-6/Welcome.html>

XXVIII IAU General Assembly in Beijing, China

Start : 2012-08-20 - End : 2012-08-31

In August 2012 China will for the first time host the General Assembly of the International Astronomical Union in Beijing. This triennial gathering of astronomers from around the world to discuss and debate the most recent discoveries about the universe is an important part of the vitality of our science. Astrophysics remains one of the most exciting areas of human endeavor, and the venue of the Beijing GA will be equally impressive: the new China National Convention Center that is housed in the Olympic Park in a beautiful, spacious building and area that is full of amenities for conference participants and visitors.

The contributions of Chinese astronomy to human knowledge and our understanding of the cosmos have been of historical significance, from the earliest to modern times. GA participants will have an opportunity to experience the wide range of astronomical activities now taking place in China that include new projects, facilities, and institutes. They will also report on, and hear, the latest research results from every field of astronomy. An exciting scientific programme is being developed that will hold the interest of everyone. I am pleased to welcome all Union members and invited guests to join us in Beijing for what will be a memorable General Assembly.

Fifth Solar Orbiter Workshop in Brugge, Belgium

Start : 2012-09-10 - End : 2012-09-14

We are pleased to announce that the fifth Solar Orbiter Workshop will take place in Brugge, Belgium from Monday September 10 to Thursday September 13. Friday September 14 will be dedicated to a Science Working Team (SWT) meeting. The workshop will focus on the science questions addressed by this exciting and recently approved mission, which is a partnership between ESA and NASA . The scientific synergy of Solar Orbiter with Solar Probe Plus and other missions will also be highlighted.

Website:

<http://www.stce.be/solarorbiter5/>

International Space Weather Initiative (ISWI) School, in Bandung, Indonesia

Start : 2012-09-17 - End : 2012-09-26

The International Space Weather Initiative (ISWI) is a program of international cooperation to advance the space weather science by a combination of instrument deployment, analysis and interpretation of space weather data from the deployed instruments in conjunction with space data, and communicate the results to the public and students. ISWI is a follow-up activity to the successful IHY 2007, but focusing exclusively on space weather . The goal of the ISWI is to develop the scientific insight necessary to understand the science, and to reconstruct and forecast near-Earth space weather . This includes instrumentation, data analysis, modeling, education, training, and public outreach. ISWI has conducted many programs not only to popularise space science all over the world but also to create favorable conditions for joint research and training in some sort of global framework. In the framework of IHY

and ISWI, some research groups have been established in several countries. In order to establish the strong space research group, particularly in Asia-Oceania countries, a training to the young students and researchers is necessary. In the framework of this program, the Space Science Center of National Institute of Aeronautics and Space (LAPAN) is honored to host the 2012 ISWI and MAGDAS School in Space Science, the school to young solar physicists and geophysicists, to be held on 17-26 September 2012 in Bandung Indonesia.

In-situ Heliospheric Science Symposium in Maryland, MD (USA)

Start : 2012-09-18 - End : 2012-09-20

In-situ observations by spacecraft provide [note in no particular order] the ground truth for comparison and constraining models, have transformed our ideas of the heliosphere , provide a natural laboratory for plasma physics, have challenged our pre-conceived ideas, and have discovered completely unexpected phenomena. This workshop will focus on in-situ observations of the heliosphere made by the unprecedented suite of instruments currently returning observations, including the STEREO spacecraft, near-Earth spacecraft (ACE,WIND , SOHO) and the Voyager spacecraft that are probing the region approaching the heliopause. It is a follow on from the ACE/WIND /STEREO ... workshop held in Kennebunkport in June 2010. The program will include an overview of recent results from current missions, invited presentations, and splinter sessions with a heavy emphasis on discussion. These sessions will focus on the solar cycle variations, solar wind , solar energetic particles, suprathermal ions, coronal and interplanetary transients, and anomalous and galactic cosmic rays.

<http://stereo.ssl.berkeley.edu/meetings/Sept.2012meeting/>

International Meteor Conference in La Palma, Spain

Start : 2012-09-20 - End : 2012-09-23

Every year, the International Meteor Organization (IMO) organizes the International Meteor Conference (IMC). This conference deals with all aspects of meteor observation as well as the underlying physics and is aimed at both amateurs and professionals.

The International Meteor Organization (IMO) will hold the 31st annual International Meteor Conference (IMC) on La Palma, Canary Islands, Spain, from 20 till 23 September, 2012. The conference will be organized by the Astro Travels agency in collaboration with the Cabildo of La Palma island authority which will sponsor this event.

Website:

<http://www.imo.net/imc2012/>

RADECS 2012 in Biarritz, France

Start : 2012-09-24 - End : 2012-09-28

The 21st European Conference on RADIATION AND ITS EFFECTS ON COMPONENTS AND SYSTEMS will be held in Biarritz, France, on September 24-28, 2012.

The aim of RADECS conferences is to provide an annual European forum for the presentation and discussion of the latest advances in the field of radiation effects on electronic and photonic materials, devices, circuits, sensors, and systems. The scope of the conference encompasses technological processes and design techniques for producing radiation tolerant systems for space, aeronautical or terrestrial applications, as well as relevant methodologies for their characterization and qualification. The conference features a technical program, an Industrial Exhibit, and one day meeting on ground effects offered on September 24 (RADGROUND). The technical program includes oral and postersessions.

The areas of interest for contributions to be submitted to RADECS 2012 include, but are not limited to:

- * Basic mechanisms of radiation effects in electronic and optical materials
- * Space, atmospheric and terrestrial environments
- * Radiation effects on electronic and photonic devices, circuits and systems
- * Radiation effects on sensors and emerging devices

* Technology and design hardening
* Radiation hardness assurance
* Irradiation facilities and testing

63rd International Astronautical Congress in Naples, Italy

Start : 2012-10-01 - End : 2012-10-05

At the forthcoming 63rd International Astronautical Congress in Naples a special session on the theme 'Effects of Space Weather on GEO Satellites' will be held as part of the 25th Symposium on Space Policy, Regulations and Economics.

This session will discuss case histories and mechanisms of effects of space weather on GEO satellites, models for prediction, and mitigation approaches. We would like to invite you to consider submitting abstracts for this session.

The call for papers can be found at The deadline for abstract submission is 29 February 2012.

http://www.iafastro.org/docs/2012/iac/IAC2012_CallForPapers.

Website: <http://www.iac2012.org/>

Space Weather and Challenges for Modern Society in Oslo, Norway

Start : 2012-10-22 - End : 2012-10-24

2012 - 2013 is expected to be years with high solar activity. This can trigger larger solar storms which can generate geomagnetic induced currents (GIC) on the earth. GIC can affect the normal operation of specific industrial operations and critical infrastructure (e.g power grids, telecom, navigation systems, etc).

During space weather events, like solar storms, electric currents in the magnetosphere and ionosphere experience large variations, which manifest also in the earth's magnetic field. These variations induce currents (GIC) in conductors operated on the surface of the earth. Electric transmission grids and buried pipelines are common examples of such conductor systems. GIC can cause problems, such as increased corrosion of pipeline steel and may disturb and possibly damage high-voltage power transformers and it can also have damaging effects on communication systems, navigation systems and oil and gas operations.

Vulnerable industries are the oil and gas industry, railways, telecommunication industry, navigation industry and not at least the society, which is very vulnerable concerning short or long term interruption of critical infrastructure.

The conference will focus on increasing the general knowledge of solar storms, space weather and GIC and the possible consequences for different industries and critical infrastructure, and look into reasonable means of protection, and consider possible early warning solutions.

Ninth European Space Weather Week in Brussels, Belgium

Start : 2012-11-05 - End : 2012-11-09

We are pleased to announce that the Ninth European Space Weather Week will take place at the Académie Royale de Belgique, Brussels, Belgium between 5 and 9 November 2012.

This meeting is being jointly organised by the Solar-Terrestrial Centre of Excellence (STCE), ESA, the SWWT and the COST ES0803 communities. The local organisation is done by the STCE. This event will continue to build on the advances made during the first eight European Space Weather Weeks held between 2004 and 2011.

International Symposium on Solar-Terrestrial Physics in Pune, India

Start : 2012-11-06 - End : 2012-11-09

The International Symposium on Solar-Terrestrial Physics will be held during November 6 - 9, 2012 at the Indian Institute of Science, Education and Research, Pune, India. This meeting under the aegis of the SCOSTEP is expected to draw leading scientists from around the world in the increasingly important, interdisciplinary fields of Solar activity and its impact on geospace and life on the Earth. With major observational solar facilities being planned in India, this meeting is especially pertinent in the Indian context.

The meeting is expected to involve professional scientists as well as graduate students, and will have a mixture of invited and contributed talks and posters. There will also be a one-day tutorial for the benefit of young people beginning work in the field of solar-terrestrial physics.

EC Space Conference in Larnaca, Cyprus

Start : 2012-11-15 - End : 2012-11-16

The European Commission will organise the 'Let's embrace space - FP7 Space Conference 2012', in cooperation with the Cypriot EU Presidency, on 15 and 16 November 2012 in Larnaca, Cyprus.

This scientific conference will present the current status and results of the 3rd call of FP7 space research, and also discuss future options for European research in the space field. In doing so, the conference will aim at demonstrating the evolution and use of space tools for a sustainable economic and environmental development in a European and global context.

Solar Physics with Radio Observations in Aichi, Japan

Start : 2012-11-20 - End : 2012-11-23

Nobeyama Radioheliograph (NoRH) has been observing the Sun since 1992. This year is the 20th year of science operation. Instruments are still in good shape and producing images of the Sun every day with the same quality as the beginning. Due to the nature of the instrument and long and uniform observations, data can be used for wide variety of solar physics and also for solar terrestrial physics. To mark the 20 years of operation, we will organize a symposium to summarize what has been done with NoRH and to discuss what we should do in the future. Papers to be presented in the meeting will be mainly concerned with the results from NoRH and future plans.

Tracing the Connections in Solar Eruptive Events in Petaluma, CA, USA

Start : 2012-11-30 - End : 2012-12-05

The overarching objective of the conference is to examine the connections amongst the phenomena that lead to solar eruptive events. The current state of themes includes:

- * Measuring the Coronal Magnetic Field;
- * Connections to, and Reactions of, the Large-Scale Corona;
- * Large-scale Magnetic Connectivity of Active Regions;
- * Transfer of Energy to, and Storage of Energy in, the Corona;
- * The High-Energy Particle - Flare - CME connection.

Working groups will address topics such as:

- * Energy Transfer throughout a Solar Eruptive Event;
- * Global Energetics of an Ensemble of Events;
- * Coronal Influences to the Lower Atmosphere;
- * CME Initiation and Type II Bursts;
- * The Release of Energetic Particles in the Low Corona;
- * Flows vs. Waves;
- * Microflares/Nanoflares.

Chapman Conference on Fundamental Properties and Processes of Magnetotails in Reykjavik, Iceland

Start : 2013-03-10 - End : 2013-03-15

Spacecraft observations have established that all magnetized planets in our solar system interact strongly with the solar wind and possess well-developed magnetotails. Magnetotails are the site for many dynamic processes critical to the circulation of mass, energy and magnetic flux. The great differences in solar wind conditions, planetary rotation rates, ionospheric conductivity, and physical dimensions from Mercury's small magnetosphere to the giant magnetospheres of Jupiter and Saturn provide an outstanding opportunity to extend our understanding of the influence of these factors. Therefore, this Chapman conference will provide a forum in which various communities can come together and discuss recent achievements of observational, theoretical, and modeling studies with the objective to develop a deeper understanding of fundamental properties and processes of planetary magnetotails through a comparative examination.

Annular solar eclipse

Start : 2013-05-10 - End : 2013-05-10

6. New documents in the European Space Weather Portal Repository

See <http://www.spaceweather.eu/en/repository>

STCE Activity Report 2007-2008

The Solar-Terrestrial Center of Excellence is a scientific project which aims at the creation of an international expert center and the valorization of Solar and Solar-Terrestrial research and services. The STCE clusters the know-how of 3 Belgian Federal institutes: Royal Observatory of Belgium ROB, Royal Meteorological Institute RMI, Belgian Institute for Space Aeronomy BISA. The STCE is built upon existing experience present in the 3 institutes related to Solar-Terrestrial physics and operates in a strong collaborative spirit within the international environment: we expect strong benefits from joint work within the networks created by ESA (SWWT, SWENET), EU (COST, FP7) and others (ISSI, ...). This document gives the first complete activity report of the STCE, covering the start-up phase 2007-2008.

STCE Activity Report 2010

The report is a compilation of the activities done in 2010 within the frame of the STCE: progress in research, new or up-tuned applications and products, supporting and coordination activities.

STCE annual meeting 2012 - Stratospheric aerosol characterization: GOMOS and other activities

Presentation given at the workshop 'Retrieval of Aerosol Properties from Satellite and Ground-Based Measurements' in the frame of the annual STCE meeting 2012

<http://www.spaceweather.eu/en/repository/show?id=186>

STCE annual meeting 2012 - Atmospheric Composition Measurements at Princess Elisabeth Station

Presentation given during the workshop 'Retrieval of Aerosol Properties from Satellite and Ground-Based Measurements' held in the frame of the STCE annual meeting 2012

<http://www.spaceweather.eu/en/repository/show?id=187>

STCE annual meeting 2012 - Climate monitoring with Earth Radiation Budget measurements

Presentation given during the workshop 'Retrieval of Aerosol Properties from Satellite and Ground-Based Measurements' in the frame of the STCE annual meeting 2012.

<http://www.spaceweather.eu/en/repository/show?id=188>

STCE annual meeting 2012 - VLIDORT and Linearized MIE for the Retrieval of Aerosol Parameters

Presentation given during the workshop 'Retrieval of Aerosol Properties from Satellite and Ground-Based Measurements' in the frame of the STCE annual meeting 2012.

<http://www.spaceweather.eu/en/repository/show?id=189>

STCE annual meeting 2012 - Retrieval of desert dust aerosols vertical profiles from IASI measurements in the TIR atmospheric window

Presentation given during the workshop 'Retrieval of Aerosol Properties from Satellite and Ground-Based Measurements' in the frame of the STCE annual meeting 2012.

<http://www.spaceweather.eu/en/repository/show?id=190>

STCE annual meeting 2012 - Aerosol retrieval from spectral measurements in twilight conditions: ground-based and satellite-based

Presentation given during the workshop 'Retrieval of Aerosol Properties from Satellite and Ground-Based Measurements' in the frame of the STCE annual meeting 2012.

<http://www.spaceweather.eu/en/repository/show?id=191>

STCE annual meeting 2012 - Retrieval of Aerosol Properties from Satellite and Ground-Based Measurements

<http://www.spaceweather.eu/en/repository/show?id=192>

STCE annual meeting 2012 - PROBA2: a success story

This presentation was given in the frame of the STCE annual meeting of 2012.

<http://www.spaceweather.eu/en/repository/show?id=193>

STCE annual meeting 2012 - On-orbit degradation of solar and space weather instruments, lesson learned

This workshop wrap up was presented during the STCE annual meeting 2012.

<http://www.spaceweather.eu/en/repository/show?id=194>

STCE annual meeting 2012 - Reduced MHD Turbulence, Homogeneous case and applications to loops and coronal holes

Presentation given during the workshop 'Alfven Waves and Turbulence in Solar-Terrestrial Plasmas' organised in the frame of the STCE annual meeting 2012.

<http://www.spaceweather.eu/en/repository/show?id=195>

STCE annual meeting 2012 - STORM: Solar system plasma Turbulence - Observations, interMittency and Multifractals

Presentation given during the workshop 'Alfven Waves and Turbulence in Solar-Terrestrial Plasmas' organised in the frame of the STCE annual meeting 2012.

<http://www.spaceweather.eu/en/repository/show?id=196>

STCE annual meeting 2012 - Implementing turbulence in kinetic modeling of solar wind particles

Presentation given during the workshop 'Alfven Waves and Turbulence in Solar-Terrestrial Plasmas' organised in the frame of the STCE annual meeting 2012.

<http://www.spaceweather.eu/en/repository/show?id=197>

STCE annual meeting 2012 - Kinetic-scale Alfvénic turbulence in the solar wind: dissipative versus dispersive effects

Presentation given during the workshop 'Alfven Waves and Turbulence in Solar-Terrestrial Plasmas' organised in the frame of the STCE annual meeting 2012.

<http://www.spaceweather.eu/en/repository/show?id=198>

STCE annual meeting 2012 - Testing theoretical models of MHD turbulence by solar wind data

Presentation given during the workshop 'Alfven Waves and Turbulence in Solar-Terrestrial Plasmas' organised in the frame of the STCE annual meeting 2012.

<http://www.spaceweather.eu/en/repository/show?id=199>

STCE annual meeting 2012 - Multifractal turbulence and magnetic reconnection at the leading edge of an interplanetary CME

Presentation given during the workshop 'Alfven Waves and Turbulence in Solar-Terrestrial Plasmas' organised in the frame of the STCE annual meeting 2012.
<http://www.spaceweather.eu/en/repository/show?id=200>

STCE annual meeting 2012 - Alfven Waves and Turbulence in Solar-Terrestrial Plasmas

This workshop wrap up was presented during the STCE annual meeting 2012.
